

Access to work areas is permitted only when accompanied by the person responsible or after receiving a safety briefing.

Entering or remaining in the track area is prohibited.

Smoking: For fire safety reasons, smoking on the premises is permitted only in designated smoking areas.

Do not use lifts in the event of a fire.

Photographs and audio recordings require permission.

Do not touch or operate machinery.

Eating in the workshop is prohibited. Consuming alcoholic drinks or other intoxicating substances is also prohibited.

Work involving hazardous substances requires the approval of your coordinator.

Hazardous work, such as welding, is permitted only with a valid work permit.

If an evacuation signal sounds (e.g. a fire alarm), leave the building immediately via the marked escape routes and go to the assembly point.

Safety footwear rated at least S1 must be worn in the workshop.

Wear any additional personal protective equipment required for the task.

Use the designated traffic routes. Take particular care at workshop entrances and exits, gates and doors. Use the designated pedestrian entrances and wicket doors. Keep escape and emergency access routes clear at all times.

Park only in designated employee and visitor parking spaces.

A maximum speed limit of 20 km/h applies throughout the premises.

German road traffic regulations (StVO) apply at the Chemnitz site. Expect vehicle movements at all times, including industrial trucks, lorries and cars. Rail vehicles always have priority.

Take particular care near pits and work platforms (risk of falling), and in narrow areas such as gateways.

Never walk or stand under suspended loads. During crane operations, wait at a safe distance until the crane operator gives permission to pass.

Vehicles and equipment may carry high voltages. Do not touch parts, components or cables. Do not reach into electrical cabinets.
